TalentLens

Find the evidence. Ask the next question.

Los pichones de Oveun

Open Agent Hackathon 2026

A shortlist should explain what to ask next

01

Interpret the role

Separate essential experience from preferences before comparing candidates.

02

Inspect the evidence

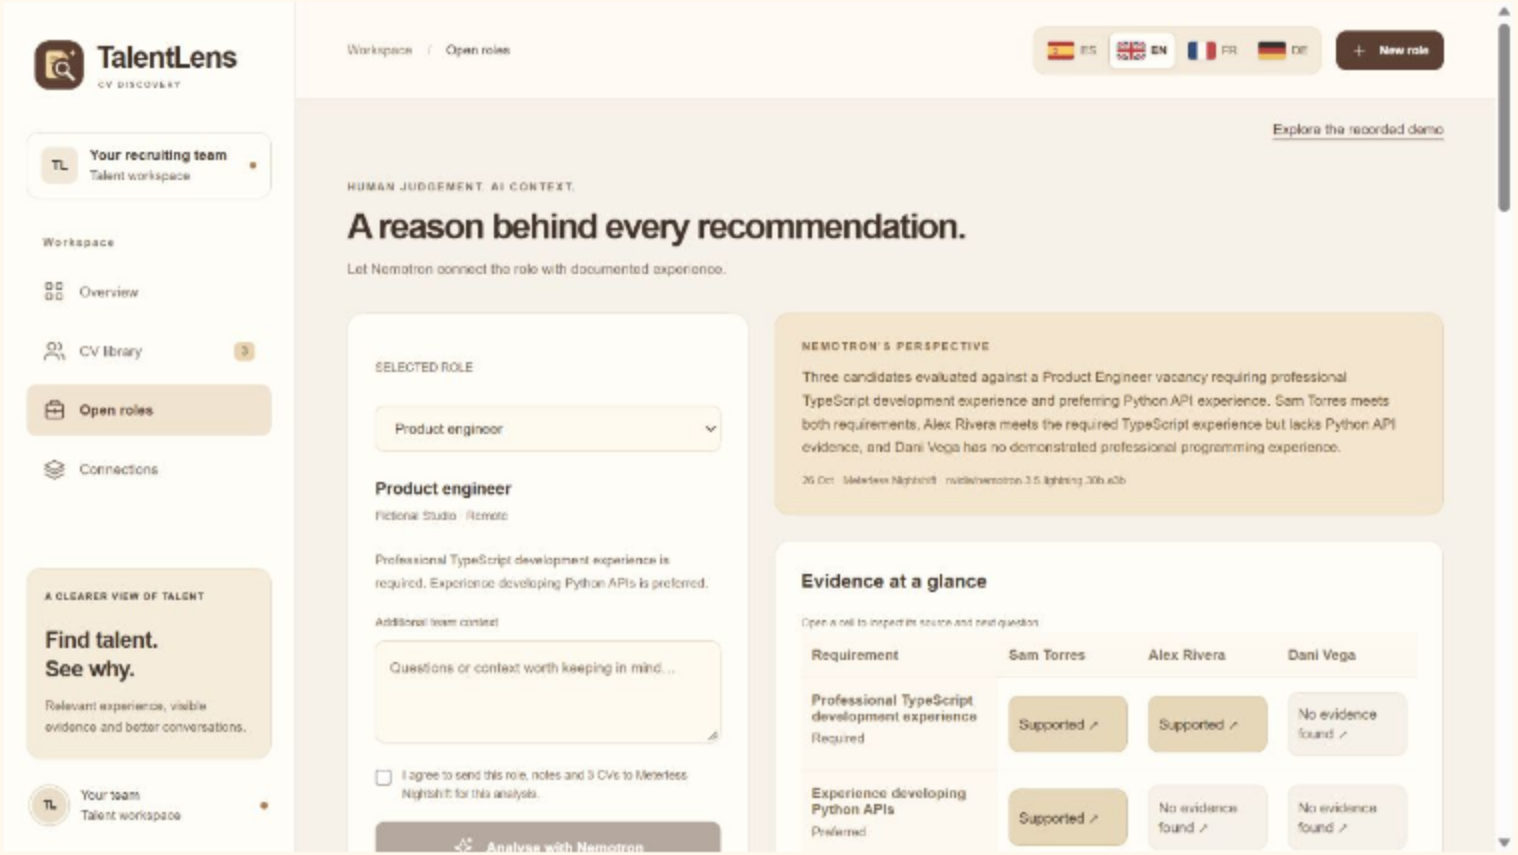

Distinguish professional experience from interest, adjacent skills and missing information.

03

Close the gap

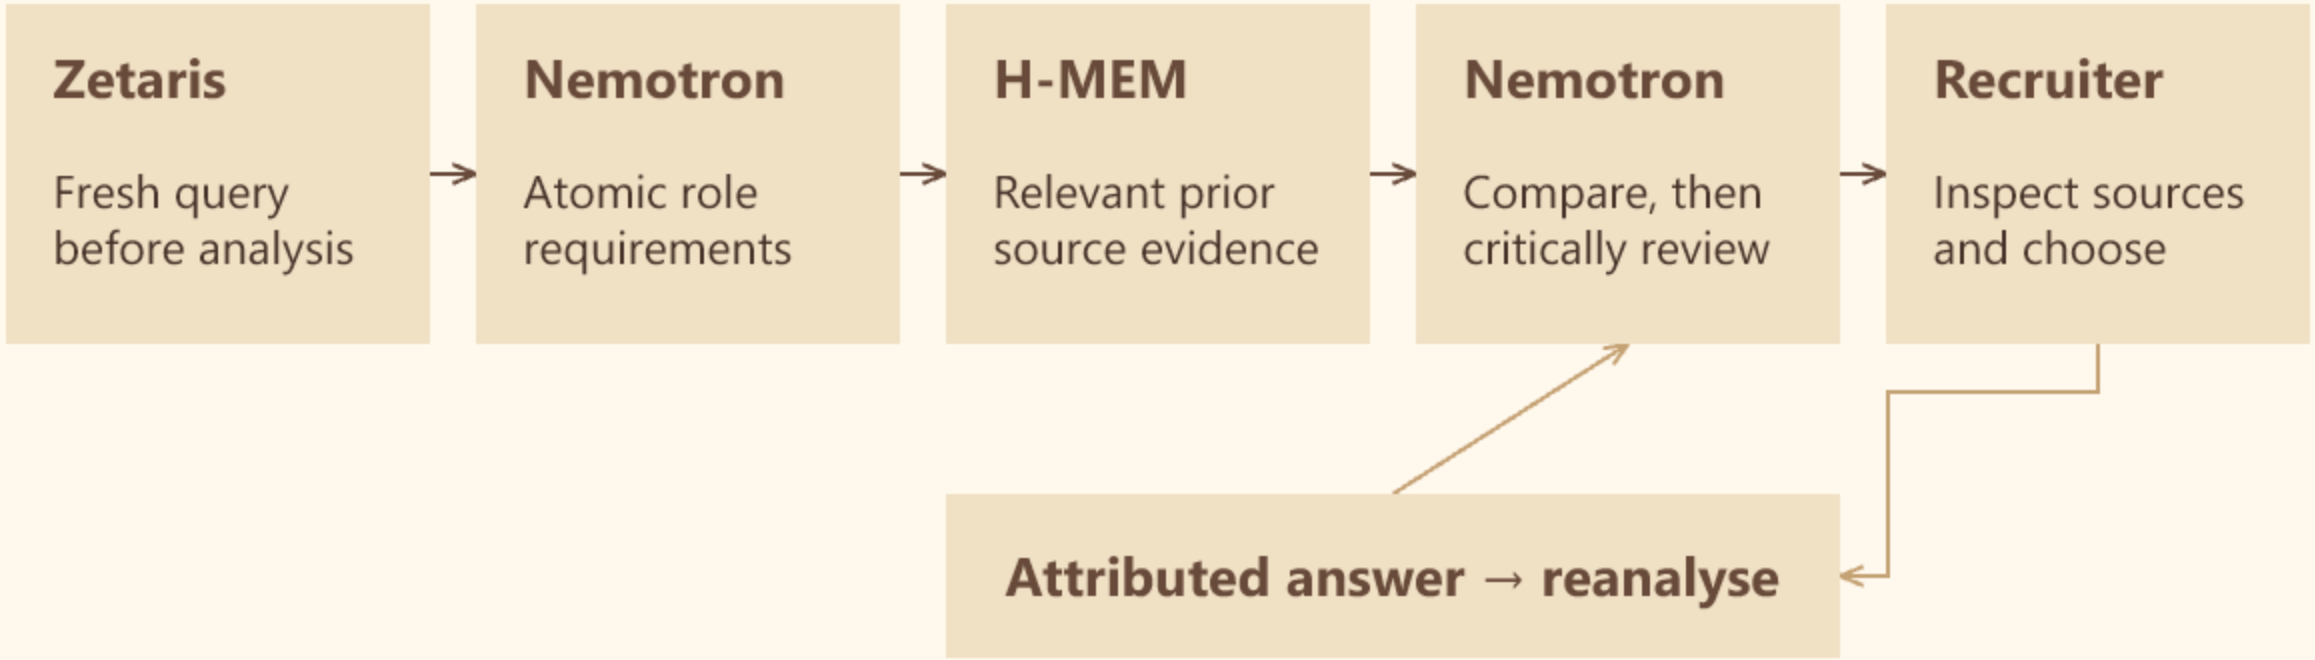

Ask a focused question, record its source and see what changes in the next review.

Every requirement, every candidate, one view

Open a cell to see its source, uncertainty and next question.

The agent turns a gap into a reviewable update

Query trace and exact document versions stay with the report.

Working integrations, with execution evidence

Zetaris	Joined profile/CV view. Three-CV live run verified with a fresh query and exact document traces.
NVIDIA Nemotron	Role interpretation, CV comparison, targeted questions and a separate critical review.
Meterless Nightshift	Primary inference provider. Actual executed model IDs and receipts are retained.
Meterless H-MEM	Context survives restarts; source versions, conflicts and deletions remain inspectable.

A new source changes the assessment

Before · unclear

"Interested in learning TypeScript and developing web accessibility skills."

Original fictional CV

After · supported by a statement

"I built and maintained a TypeScript billing dashboard for a client from January 2024 to January 2026."

Attributed fictional interview answer

The original CV remains intact. The recruiter can inspect both sources.

Earlier context remains useful in another role

Same role + current CVs

Without earlier context

Unclear

Only the CV's interest in learning TypeScript is available.

With H-MEM after restart

Supported

The prior attributed answer is retrieved and cited in the new report.

One recorded comparison. Sources and receipts are available in the repository.

Small, reproducible quality checks

16

fictional profiles

32 / 32

expected assessments match

0

unsupported positives

50 application tests and 13 official H-MEM checks

Includes negation, conflicting statements and a CV instruction attack.

Authored cases, not a general accuracy claim. Critical review changed 0 cells in this run.

Test the workflow before claiming impact

Ready to try

16 downloadable fictional CVs

Manual and assisted review rounds

Actual session timing and answers

English, Spanish, French, German

Still to establish

Recruiter observations and impact

Broader quality and bias evaluation

Production identity and access

OCR and larger document sets
